

AIRBUS NETHERLANDS

“We pioneer sustainable aerospace for a safe and united world.”

AIRBUS

About us

At **Airbus Netherlands** our purpose is to improve life on Earth and beyond through cutting-edge space technologies. For many years, the Dutch space company has been contributing to the success of international missions. Today, its innovative technology is supporting the integration and sustainment of advanced space systems, bringing a strong expertise in areas like Earth observation, telecommunications and science. By supplying reliable products and services ranging from solar arrays to launcher structures, Earth observation instruments, thermal straps and optical ground stations for laser communications, Airbus NL provides solutions for customers and their programmes around the globe.

Solutions

- **ARAmk4 Solar Arrays:** high-tech solar arrays for every mission type.
- **Sparkwing Solar Arrays:** plug-and-play solar array to power individual smallsats an complete constellations.
- **Launcher Structures:** highly-loaded structures for Ariane 6 & Vega-C.
- **Laser Communications:** Optical Ground Stations (OGS) & Air terminals.
- **Noctua EO Instruments:** emission monitoring spectrometers.
- **HiPeR Flexlinks:** light-weight, flexible point-2-point thermal straps.
- **EGSE:** modular platform and payload EGSE for satellite testing.

Company highlights

Milestones of the past year, highlighting our expertise: successfully powering Artemis-1, delivering the wings for JUICE, the first launch of Sparkwing with Aerospacelab, the last Ariane 5 launch with our engine frames, delivering Vulcain Aft Bay FM4 for Ariane 6, our European Robotic Arm moving the airlock at the ISS, EO instrument Tropomi celebrating 5 year in orbit. Integration of the innovative SPEXone instrument on NASA's PACE platform.

Company facts

- Airbus Netherlands is the largest space company in the Netherlands.
- Over 50 years of heritage in developing space technology.
