

NL SPACE CAMPUS

“Connecting the Curious.”

About us

The **NL Space Campus** is the Dutch gateway to space. Along with its partners, the campus stimulates knowledge sharing and collaboration for increased innovation, business activity, and societal impact.

Together with its partners, the campus organises events and activities that facilitate direct interaction within the growing ecosystem of businesses, investors, engineers, researchers, students, young professionals, and government entities. The physical location of the campus grows into a vibrant beating heart of the Dutch space ecosystem in the coming years, featuring facilities such as laboratories for testing and experiments, versatile office spaces, and event venues.

Solutions

The campus accelerates space companies in achieving their goals and intended impact by providing access to the right **network, capital, knowledge, facilities, and talent**.

With ESA's ESTEC and its experts, EUSPA's Galileo Reference Centre, the Space Business Innovation Centre on campus and collaboration with Leiden-Delft-Erasmus universities nearby, the campus provides an ideal hub for companies seeking Dutch space ecosystem integration.

Company highlights

- Home of the Dutch facilities of the European space organisations.
- Host of 'The Space Week', attracting 10,000+ international visitors.
- Manager of the Dutch space community with monthly networking events.
- ESA Business Incubation Programme housed on campus.
- Multiple facilities in development, more plots available.
- Next edition Summer School in 2024.
