

PENTACON

“Delivering industries the best technical solutions.”

About us

Pentacon is a mechanical & mechatronics engineering firm, delivering technical solutions for multiple industries. Since its founding in the year 2000, Pentacon has managed to build up a solid track record in the Space & Aerospace industry.

For the Space industry we are specialized in MGSE engineering and hardware delivery for rocket- and satellite programs. Challenging projects, close collaborations and a passion for profession have ensured that our team of engineers are leading specialists in their field.

As a tooling specialist, Pentacon is also preferred development partner for scientific organizations, making sure tests can be performed in a safe and controlled way.

Solutions

- MGSE design and hardware delivery
- MGSE track record: Ariane 6 (NeBuLa), Ariane 5 and 4, Vega-C rocket, Tropomi, Hera, Space Rider, Orion MPVC, Spacebus NEO, and many more..
