

TERMA

“Allies in innovation”

About us

With more than 1,600 employees worldwide, **the Terma Group** develops and manufactures mission-critical products and solutions that help to keep people safe, both in peaceful times and in times of conflict.

Since the 1970s we have been supplier to over 75 international space missions. Our space activities include all phases of a mission’s lifecycle - from the early feasibility studies for missions through their realization and operation, and finally to the exploitation of the results of the mission.

With Terma, you get an ally in innovation. We offer state-of-the-art electronics, software, and services for space programmes, developed by a team with a long track record of mission success.

Solutions

- **Flight hardware** – established equipment level supplier of space electronics.
- **Flight software** - together with the tools you need to test and debug them.
- **Ground hardware** – power & RF SCOE’s for EGSE’s.
- **Ground software**- for satellite operations and testing.
- **Engineering services** - in a wide range of technical space disciplines. Ranging from individual consultancy positions through to teams of engineers providing a complete service.

Company highlights

- Many ESA missions use our power electronics, star trackers, are tested with our EGSE solutions, checkout and simulation software, and controlled with our satellite control system software.
- Also commercial constellations such as OneWeb are tested with our checkout software
- Terma are proud to be Prime Contractor for the ASIM observatory on the ISS

TERMA[®]

Company facts

- Founded 1949 in Denmark and privately held
- 1,600 FTE’s and revenue of €303M in 2023
