

MEILINK

“Securing Value.”

About us

Meilink specializes in the design, testing and manufacturing of industrial packaging, expertly packaging, high-tech cleaning and worldwide transport of capital goods. With a range of Chain Solutions, from development to sustainable reuse, Meilink stands as a reliable partner for companies in the manufacturing industry, ensuring timely, undamaged, and flexible delivery.

Solutions

For fragile equipment and industrial machinery, we offer tailored packaging solutions that integrate seamlessly into your customer's chain, ensuring maximum security at minimal cost. With over 150 years of experience, we handle design, production, and testing. In our fully equipped cleanrooms, we clean components manually and ultrasonically, with an additional step of baking out parts in our vacuum and atmospheric ovens. To ensure molecular cleanliness, we utilize our one of our seven RGA systems. After validation, we assemble, package, and ship your product. Our specialized logistics ensure high-value shipments align with your processes globally.

Company highlights/ Milestones

Meilink is awarded the Designation 'Royal'. On the day we celebrated Meilink's 150th anniversary with the employees of our nine branches, we were also awarded the Designation 'Royal'. A very special moment! From now on we may call ourselves Royal Meilink, which is a title we are proud to bear!
